Another International Conference Planned

Following the two well attended International Conferences on Auriculotherapy, and Auricular Medicine in Las Vegas August 1999, and Chicago August 2006, another Intl. Conference is being planned for September 2011. Contact the Electro Therapy Association for dates, or check the above websites for updates. **Get in on the early bird registration.**

Another First

This educational program is a first for a full week training program to be held each month for just auriculotherapy in the United States.

Auriculotherapy

The ultimate for pain management

Monthly Training Program

Since 2001

Sponsored By

Electro Therapy Association

Join us for an exciting educational experience

Auriculotherapy Simplified

The Pain Institute of Tulsa and the Electro Therapy Association are offering an intensive educational course on auriculotherapy monthly of up to 5 days for odd months, with a sixth day Saturday option on even months with guest faculty.

You will be exposed to the French and Chinese systems of auriculotherapy, focusing on the electrical diagnosis and treatment, researched by the late Paul Nogier MD, of Lyon France.

You will learn simplified and effective techniques using Auriculotherapy with comparisons to the VAS (Vascular Autonomic Signal), a.k.a. the Nogier Reflex, in honor of the late Dr. Paul Nogier.

Seminars and workshops are being planned throughout the United States with very qualified faculty, with simplified techniques in diagnosis and treatment.

You may register from one up to five days as long space is available. A choice of educational videos and a VCR will be available for evening study if attendee desires.

Course Objectives

- The program is designed to give the attendee intensive training in the clinical setting, with hands on experience to properly utilize Auriculotherapy.
- To be successful with auriculotherapy immediately after completion of the course.
- Pre-selected Protocols by attendee that best fits the interest and practice will be covered.
- To simplify the technique so the physician will feel comfortable teaching staff to assist with treatment, freeing physician for other patients, and duties, thereby making the procedure very cost effective.
- Making Auriculotherapy so simple, and practical, that it will compliment any practice.

Basic Training

- History of Auriculotherapy to date.
- Anatomy of the ear with detailed landmarks.
- A simplified technique in diagnosis and treatment.
- Comparisons of European, Eastern and Western mappings as represented on the ear.
- Library of books available for viewing.
- The polarities, high versus low resistance, differential selection, researched by Paul Nogier MD.
- Hands on experience with problem patients.

Advanced Training

- The Nogier 3 layers, Endodermal, Mesodermal Ectodermal, with detailed mappings.
- Overcoming hindrances, laterality, oscillation, and toxic scars.
- Two days allowed for hands on training, with difficult or chronic pain patients.

Check our website for more detailed information about our seminars and training.
